//About me

All about my life

I can talk about my life for a long time. At my age, I have a little experience that I could share.

If life were a colorful tapestry, mine would be a vibrant mosaic, woven with diverse experiences and cherished moments. As an active and sociable individual, I relish every beat of life's rhythm, seeking to add value to each precious moment.

Fuelled by a profound passion for programming, I have embraced my current role with fervor, and my aspiration is to become an outstanding programmer with an in-depth understanding of my craft.

Looking ahead, my vision is one of perpetual growth, where I am determined to continually sharpen my skills and expand my knowledge. For me, the future is an exhilarating journey of intellectual enrichment and becoming a true coding maestro XD.

My interests

Speaking of my interests, they may not be numerous, but they are carefully chosen to ensure a fulfilling and enriching holiday for both my physical well-being and mental growth. Here's a glimpse into the facets that make my leisure time truly worthwhile:

Work Experience

2017 - 2018 Sushi Bar in Siedlce, waitress

2018 - 2019 Printing House "Iwonex", assistant

I decided to add job experiences that are not related to my specialty to show that I am a person who can work long and hard :)

03/2020 - The course "Internet Content Accessibility Tester"

The next thing that happened to me was my first practice where my task was "Make a website with a database on the subject of "Project Tracking System" (Used HTML, CSS, JS, jQuery, PHP and SQL).

07/2020 - Internship at the University of Natural Sciences and Humanities in Siedlce

The next course I took will help me to get a job in Poland and get a good practice in Germany in the future.

04/2021 - The course "Dev Hero: Remote course Front End"

It was my first internship at the firm, I learned a lot in these three months :)

07/2021 - Practice in a private company in Siedlce, working on commercial projects as a Junior Front-End Developer

During almost all my studies, I constantly worked part-time

-  Travel and cultural exploration
-  Fitness classes
-  Reading
-  Photo and video shooting

Education

Until the age of 17, I lived in Belarus, so I received my secondary general education there.

2006 - 2017 Secondary school in Brest, Belarus

At the university, I'm studing a little longer than expected due to personal circumstances. I'm studing at the computer science faculty.

2019 - now Siedlce University of Natural Sciences and Humanities

While studying at the university, I had the opportunity to take a free course "Information technology supporting people with visual impairment", which was organized by the university.

03/2020 - The course "Internet Content Accessibility Tester" 06/2020

A year later, I realized that the university does not provide enough narrow knowledge to be able to get a job in the future, so I bought courses in ReactJS. But during this course, I also greatly improved my knowledge in js, css and scss.

04/2021 - The course "Dev Hero: Remote course Front End" 10/2021

A couple of months later completing these courses, I was able to get a job :)

After I got a remote job, I went to Germany for one semester as an exchange student to study. I studied in the city of Trier at the Faculty of Computer Science.

04/2022 - Hochschule Trier – Trier University of Applied Sciences 08/2022

Also, while studying in Germany, I managed to do an internship in a private company in Trier.

06/2022 - Practice at the firm meetingmasters.de e.K. 10/2022

I had to do part of the practice work remotely, as my German visa was expiring ;)

somewhere, because I lived on my own.

01/2019 - 03/2022 RGIS, inventory worker in the retail area

The next practice was not limited by time frames (for example, 320 hours), I worked for the company until I did the tasks indicated at the very beginning.

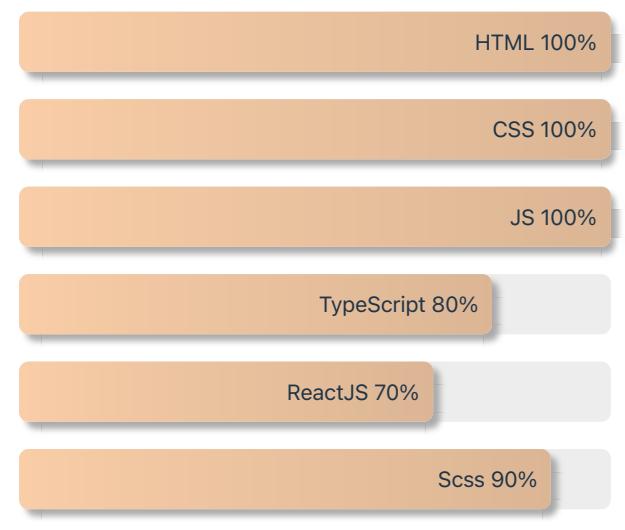

Practice at the private company 06/2022 - "meetingmasters.de e.K." in Germany, Trier, 10/2022 working on commercial projects as Junior Front-End Developer

At the next company, I worked remotely. At first I worked part-time, and then I started working full-time.

03/2022 - Blunovation Sp. z o.o, Junior front-end 04/2023 developer

//Skills

Below are the skills I possess, along with a brief description of my proficiency level in each:

Below you can find the tools and libraries that I managed to work with ;)

//Tools

Tools and libraries

Material UI
v 5.14.2

Redux Toolkit
1.9.5

Formik docs
2.4.2

Vite.js
4.4.7

D3.js
4.0.1

Bitbucket
7.21.0

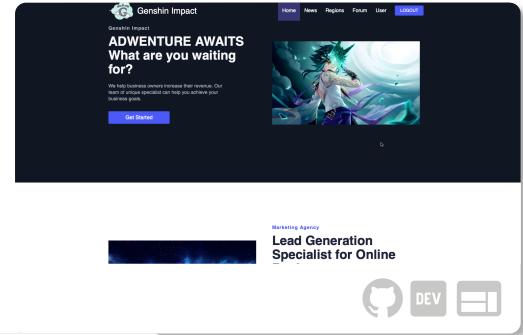

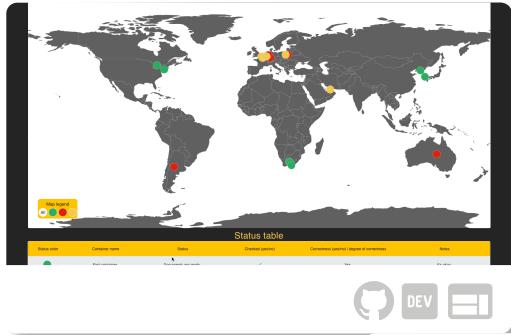

Styled Components
6.0.5

Adobe Photoshop
24.7

//My works Portfolio

Welcome to my evolving portfolio of programming projects, where quality reigns supreme over quantity. While my collection may not be extensive, rest assured that each project is imbued with soul, passion, and unwavering commitment. With every line of code written, I embark on a journey of continuous improvement, determined to hone my skills and create software solutions that leave a lasting impression. As the years pass, my portfolio will undoubtedly grow in both scope and sophistication, becoming a true reflection of my dedication to the craft and my relentless pursuit of excellence. So, join me on this dynamic journey, where every project tells a unique story of growth, learning, and the unwavering desire to make a difference through the power of programming.

Language skills

	Polish
	Advanced [C1]
	Russian
	Native
	English
	Intermediate [B1]

Closing thoughts

In this journey of growth and discovery, my unwavering passion for programming has shaped me into a versatile and innovative developer. As I eagerly embrace the future, I am committed to making a profound impact in the tech world, leveraging my skills and determination to create software solutions that transcend boundaries and inspire the world. With a hunger for knowledge and a heart full of ambition, I look forward to embarking on new challenges, collaborating with like-minded individuals, and contributing to transformative projects that leave an indelible mark. Thank you for considering my candidacy, and I am excited to be part of a team that shares my vision for excellence and embraces the endless possibilities that lie ahead. Let's join forces and embark on a remarkable journey together :)

Communication skills

Collaborative team player

Proficient in working within diverse teams, actively participating in discussions, and contributing constructively to project development.

Active Listening

Demonstrated skill in attentively understanding project requirements and user feedback, ensuring accurate implementation and client satisfaction.

Clear and Concise Communication

Expressing ideas succinctly, avoiding ambiguity in technical discussions and written communications.

Conflict Resolution

Skillful in addressing disagreements constructively and finding amicable solutions during project development.

Problem-Solving Communication

Communicating solutions to programming challenges with clarity and precision, enabling effective troubleshooting and debugging.

Adaptability in Communication

Tailoring communication style to suit different audiences, whether it be fellow programmers, management, or end-users.
